

# ACTIVATE YOUR JUNIPER NETWORKS VGW VIRTUAL GATEWAY FEATURES

This document briefly describes how to use your Juniper Networks Authorization Code to generate a license activation key for your Juniper Networks® vGW Virtual Gateway solution. The figure below also highlights the major steps in the process.

## Four Easy Steps to Activate Your Juniper Networks Software Product Feature(s)

1. Gather your Authorization Code and vGW software serial number.  
**Authorization Code:** The 16-digit alphanumeric Authorization Code is sent in response to your order and is required to generate the license activation key for your vGW product. Note: The Authorization Code is required to generate your license activation key—it is not the license activation key itself.  
**Software Serial Number:** The serial number is a unique 14-digit number that Juniper uses to identify your particular software installation. You can find the software serial number in the Software Serial Number Certificate attached to the email sent when you ordered your Juniper Networks software (Security Design vGW Software).
2. Sign into the Juniper Networks License Management System at [www.juniper.net/generate\\_license](http://www.juniper.net/generate_license). Select the vGW link, and follow the instructions in the system user interface.
3. The License Management System will provide you with your vGW license activation key in one of two ways:
  - Downloading your license activation key to your computer from the Juniper Networks License Management System.
  - Receiving an email from the Juniper Networks License Management System containing your license activation key.
4. Sign into the Security Design vGW Software administrator Web interface and enter your license activation key on the Settings > Status & License screen.

### Quickly and Easily Activate Your vGW Product

For more detailed information regarding license activation key types, generating a new license activation key, and upgrading existing license activation keys, please refer to the [Juniper Networks vGW Virtual Gateway Administration Guide](#).

For additional assistance, you may contact Juniper Networks Customer Care at +1-888-314-5822 (United States) or +1-408-936-1572 (outside the United States). Alternately, you may also open a case online via the Juniper Customer Support Center (CSC) Case Manager.
