

ACTIVATE YOUR JUNIPER NETWORKS VGW VIRTUAL GATEWAY SUBSCRIPTION

1. Gather your Authorization Code and device serial number.
Authorization Code: The 16-digit alphanumeric Authorization Code is sent in response to your order and is required to generate the license activation key(s) for your vGW product.
Note: The Authorization Code is required to generate your license activation key—it is not the license activation key itself.
Device Serial Number: The serial number is a unique 14-digit number that Juniper uses to identify your particular software installation. You can find the software serial number in the Software Serial Number Certificate attached to the email sent when you ordered your Juniper Networks software (Security Design vGW software).
2. Make sure the software is registered. If it is not currently registered, please register the software as you register the subscription Authorization Code. Products and subscription Authorization Codes can be registered at <http://tools.juniper.net/subreg/>.
3. From the juniper.net/subreg site, you will be directed to the Juniper Networks License Management System (LMS) where you can generate the subscription activation key (on demand). LMS will provide you with your vGW license activation key in one of two ways:
 - Downloading your license activation key to your computer from the Juniper Networks License Management System.
 - Receiving an email from LMS containing your license activation key.
4. Sign into the Security Design vGW administrator Web interface and enter your license activation key on the Settings > Status & License screen.
